Thinkcloudly's Training Methodology

Live Projects : To facilitate experiential learning during the training period, participants participate in Live Projects. It helps in gaining a better understanding of the concepts and a deeper understanding of practical applications.

Unique Pedagogy : The teaching techniques used are based on our G.C.A.O. (Goal Centric Action Oriented) pedagogy. In this way, participants can derive action-oriented outcomes from their training.

End-to-End Engagement : We will engage the participants throughout the training with reverse presentations, assignments, quizzes, and brainstorming sessions.

Potential **Career Options in Azure**

Azure Administrator

Azure Platform Engineer

Module 1 : Cloud Computing Concepts

Content :

- Cloud Concepts
- Elasticity
- Scalability
- Cloud Service Models
- Cloud Economics
- Cloud Deployment Models

Module 2 : Azure Core Services

Content :

- Azure Core Services Overview
- Azure Resource Manager
- Azure Regions
- Groups

Hands-On :

1. Quick Overview of Azure Portal
2. Demo on Resource Groups

Module 3 : Compute

Content :

- Azure Virtual Machine
- VM Availability
- Availability Zones
- App Services
- Containers
- Serverless Computing
- Comparing Compute Options

Hands-On :

- Create a VM
- Connect to a Windows VM
- App Service Plan
- Deploy Web App

Module 4 : Networking

Content :

- Networking Overview
- Content Delivery Network
- Hybrid Connectivity
- Load Balancers

Hands-On :

- Load Balancing
- Content Delivery Network
- Virtual Networks (VNETs) and Subnets

Module 5: Data and Storage Services

Content :

- Types of Data
- Azure SQL
- Cosmos DB
- Azure Storage
- VM Disk Storage
- Storage Account Overview

Hands-On:

- Storage Account via Azure Portal

Module 6 : High Availability and Scalability

Content :

- Accounts and Subscriptions Overview
- Domain Services
- Azure AD
- RBAC
- Resource Locks
- Azure Policy

Hands-On:

- RBAC
- Azure Policy
- Resource Locks

Module 7 : Compliance, Security, and Cost

Content :

- ASecurity Center
- Compliance and Security

Hands-On:

- Security Center
- Walkthrough: Pricing Calculator and Azure Advisor

Who can **Apply for our Courses?**

- ✓ Anyone with a bachelor's degree and passion for Cloud and DevOps technologies
- ✓ Professionals looking to grow their career as a Cloud Architect
- ✓ Any IT Professional with a bachelor's degree looking to transition into cloud computing
- ✓ Project Managers / Product Managers looking to up skill in Cloud and DevOps
- ✓ Developers who want to use Cloud Computing applications and build platforms

HOW TO **ENROLL WITH US?**

After completing enrollment process, You will receive your login credentials in your mail.

Deloitte

THE **WHOLE TRUTH**

The training session was detailed enough to help me get through my AWS Certification and get through my interviews successfully.

Jeneeni

It makes me happy that THINKCLOUDLY makes sure you learn it and perform on your own. The interview preparation is also top notch

Oluwafunmilayo

I have completed Azure Fundamentals Certification from Thinkcloudy. The course content is well maintained with current industry practice.

Alan M. Anthony

Thinkcloudy's recorded video sessions of class lectures is amazing, so if you can't attend any class, you can learn from them. Many thanks

Ashley R. Steinbeck

About US :

ThinkCloudly started with the idea that education is a powerful tool that provides the required knowledge, skills, and techniques to live a respectful life and transform people's lives.

ThinkCloudly is a Global cloud learning platform where you can begin your journey to become a CLOUD professional. We are committed to upskilling you by offering dedicated courses to develop the employment abilities of our students.
